Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Doss or the German patent in view of Kronfalt. Doss or The German patent discloses the claimed invention except for the diffusion cone. Kronfalt teaches that it is known to provide ventilation apparatus with a pressure distribution member as set forth at column 1, line 59 to column 3, line 17. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the sheath of Doss or the German patent with the diffusion cone, as taught by Kronfalt in order to equalized the pressure through the perforated openings. As to claims 3 and 7, the angle of the diffusion cone at the apex of 45° and the porosity of the perforated material being 0.5 constitute an obvious matter of design choice dependent upon the length of the sheath, the diameter thereof, and the amount of air pressure applied thereto; therefore the angle of 45° and the perforation being 0.5 would have been obvious to one having ordinary skill in the art, since the alleged criticality of the angle and porosity has not been disclosed as solving any stated problem or producing any unexpected result.

Drawings

3. The drawings were received on December 9, 2004. These drawings are acceptable.

Response to Arguments

Applicant's arguments filed December 9, 2004 have been fully considered but they are not considered to be germane to the limitations of the claims. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Further, no work surface is positively recited in the claims. A work surface is only mentioned in the claims in functional language.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
